

Green passport

NHL 5-1 charging cable

Material

Cable housing: RPET

Connectors: Standard USB & Type-C/Lightning

Custom box: Recyclable cardboard

Environmental Impact

The use of RPET reduces reliance on virgin plastic and diverts plastic waste from landfills. Tailored production ensures minimal surplus and optimized resource use.

Packaging

Custom-designed box made from recyclable cardboard. Compact size minimizes packaging waste.

Transport

Bulk-shipped and consolidated for efficient logistics and reduced emissions per unit. Preferably transported by sea freight.

End of Life

Cable components can be separated for recycling where facilities exist. Packaging is fully recyclable.

Why it's green

Made with recycled PET

Custom design minimizes waste

Recyclable packaging

Promotes reusability through durable design
