

# Green passport

## NHL Tube Lanyard (RPET)

### Material

100% RPET (Recycled Polyethylene Terephthalate)

Metal clip and keyring

Woven label

### Environmental Impact

Using RPET reduces plastic waste and supports circular use of materials. Each lanyard gives a second life to used PET bottles, lowering the carbon footprint compared to virgin plastic alternatives.

50

75

### Transport

Shipped in large batches to reduce emissions per unit. Optimized logistics via sea freight where possible.

### End of Life

RPET material is recyclable. Remove the metal clip and keyring before disposal to separate materials for proper recycling.

### Why it's green

Made from post-consumer recycled plastic

Recyclable components

Reduced packaging waste

Long-lasting, reusable design
